

UPCOMING EVENTS

Today, 4:00pm CEST:
Study Info Webinar

04.-06.07.2023:
GI_Salzburg23, in Salzburg

01.09.2023:
UNIGIS Salzburg: Application deadline for the October intakes (English)

01.10.2023:
Start of the UNIGIS professional and the UNIGIS Master programs

Info Webinar - Today!

Become a GIS expert with UNIGIS! Join us online. You have been thinking about studying Geoinformatics online with UNIGIS? We inform you about the next start, the fees (index adjustment next year), the schedule, the module content, and your specialisation possibilities. Gudrun Wallentin (Head of UNIGIS Salzburg) and Judith Grubinger are happy to answer all your questions.

> Register here for free and join the webinar at 4:00 pm CEST

GI_Salzburg23

4. - 6. Juli 2023 in Salzburg, Austria

GI_Salzburg - UNIGIS GetTogether

Join the GI_Salzburg23 and find yourself in the middle of a buzzing GI-scene!

Every year in July, the Department of Geoinformatics at the University of Salzburg organises the international Geoinformatics conference **GI_Salzburg**. Get inspired by great Keynotes, learn about the latest updates from GI-researchers, and mingle with the GIS-community. You are a UNIGIS student, UNIGIS alumni, UNIGIS staff, or interested in the UNIGIS program? Come to our unique UNIGIS Forum on July 5th, to exchanges on experiences, have a nice chat, and enjoy the atmosphere - with hopefully great weather, surrounded by the Austrians mountains.

Nepal Study Centre

UNIGIS Kathmandu recently reached 10-years of smooth operation. On this occasion, Judith Grubinger from the University of Salzburg, visited the study site. The visit included various activities, such as meetings with active students, faculties and management, workshops, a graduation ceremony, a thesis defense, and project presentations. During the graduation ceremony, students presented their work and were felicitated with shawls and tokens of love, along with their graduate degree certificates. Overall, the event was a great success, and we are proud to see UNIGIS Kathmandu excelling in the field of Geoinformatics (Him Lal Shrestha).

> Read more about Judith's experiences in the latest Offline issue, on p. 3

New: UNIGIS Blog

You want to read more about the latest module updates, real-life projects, and #geoinformatics related news from UNIGIS lecturers or students? Have a look at the **UNIGIS blog**. Since March 2023, we publish postings in a roughly biweekly interval, and we have many topics to come. Up until now, you can find entries on ChatGPT, R Markdown, and the Optional Modules - and we have two more postings planned for May, still. © Also, follow us on social media and stay tuned for new posts and info from Team UNIGIS.

What do we do in ENVMON?

- This module introduces methods related to acquiring data and identifies sources from which geospatial data may be acquired, focused on the how to better understand our changing environment
- We learn, from the basis, how important it is to know and understand our life spaces at different scales and dimensions

UNIGIS Optional Modules Day 2023

On May 9, 2023, UNIGIS invited students and prospective students to the annual Optional Modules Day. Petra Stutz and Christian Neuwirth guided us through the presentations and interviews, which included: Anita Graser, Christian Neuwirth, Norbert Hackner-Jaklin, and Leo Zurita. Leo is the new lecturer of the Optional Module 'Environmental Monitoring'. He is an expert in the field, and after introducing himself, he talked us through the renewals, such as more examples of real world scenarios in Europe and Latin America, or introducing ArcGIS next to QGIS and R in the module.

> You can watch his presentation and all other recordings from the Optional Modules Day here.
